PRODUCT PROFILE

GENERAL DESCRIPTION
Modified Aromatic Polyurethane Primer

COMMON USAGE
A single component, moisture-cured resin, containing a proprietary blend of micaceous iron oxide and zinc to function as a primer which is field and shop friendly. May be used in OEM manufacturing, potable water and wastewater immersion with the proper topcoats. May also be used for marginally prepared rusty steel and tightly adhering old coatings for non-immersion maintenance situations.

COLORS
1216 Greenish-Gray

SPECIAL QUALIFICATIONS
NSF: Certified in accordance with ANSI/NSF Std. 61 for potable water applications (for tanks of 1,000 gallons capacity or greater, pipes 36 inches in diameter or greater or valves 4 inches in diameter or greater) when topcoated (with or without 44-710 Urethane Accelerator) with Std. 61 certified Tnemec coatings.

AISC: Meets AISC requirements in accordance with RCSC Appendix A for Class B surface with a mean slip coefficient no less than 0.50 and tension creep not in excess of .005 inches (.13 mm). Contact Tnemec Technical Service for more information. Note: Using other products as primers or topcoats voids AISC requirements. Contact your Tnemec representative for specific recommendations.

PERFORMANCE CRITERIA
Contact your Tnemec representative for specific test results.

COATING SYSTEM

SURFACER/FILLER/PATCHER PRIMERS TOPCOATS
For information, contact Tnemec Technical Services.

Note: If Series 1 is exterior exposed for 1 year or more it must be scarified or recoated with itself before topcoating.

Scarringification or recoating with itself is required if the Series 1 has been exterior exposed for 3 days or longer and Series 113 is the specified topcoat. Note: Series 115 requires Series 44-900 adhesion promoter when topcoating Series 1.

Note: Certain topcoat colors may not provide one coat hiding depending on method of application. Contact your Tnemec representative.

Note: Series 1 requires one day exterior exposure before topcoating with Series 27WB, 1028, or 1029.

SURFACE PREPARATION

STEEL
Immersion & Severe Exposure: SSPC-SP10/NACE No. 2 Near-White Blast Cleaning
Non-Potable, Non-Immersion Service: Exterior Exposure: SSPC-SP6/NACE No. 3 Commercial Blast Cleaning. Interior Exposure: SSPC-SP3 Power Tool Cleaning (SSPC Rust Grade Condition C).

Slip Critical Connections: SSPC-SP5/NACE 1 White Metal Blast Cleaning or SSPC-SP3 Power Tool Cleaning (SSPC Rust Grade Condition C).

STEEL MAINTENANCE
Abrasive blast cleaning produces the best coating performance. If conditions will not permit this, Series 1 may be applied over SSPC-SP2 or SSP5 Hand or Power Tool Cleaned surfaces (SSPC Rust Grade Condition C) in non-potable, non-immersion environments.

Galvanized Steel
Surface preparation recommendations will vary depending on substrate and exposure conditions.

Contact your Tnemec representative or Tnemec Technical Services.

Ductile Iron
Recommended for immersion and exterior exposure. Please contact your Tnemec representative for specific recommendations.

Painted Surfaces
Test patch is recommended.

All Surfaces
Must be clean, dry and free of oil, grease and other contaminants.

TECHNICAL DATA

VOLUME SOLIDS
61.0 ± 2.0% (mixed)

RECOMMENDED DFT
2.5 to 3.5 mils (65 to 90 microns) per coat. Note: NSF certification maximum: 3.5 mils.

CURING TIME

† 50% Relative Humidity. Note: Refer to product listings on www.tnemec.com for specific potable water return to service information. Curing time will vary with surface temperature, humidity and film thickness.

Note: When recoating Series 1 with itself, the minimum recoat time is 2 hours at 70°F (21°C).

Ventilation: When used in enclosed areas, provide adequate ventilation during application and cure.

With 44-710: The use of 44-710 can greatly reduce dry to handle cure times. Note: Series 44-710 Accelerator must be used when the surface temperature falls below 50°F (10°C).

With 44-710: The use of 44-710 Accelerator may greatly reduce dry to handle cure times. Note: Series 44-710 Accelerator must be used when the surface temperature falls below 50°F (10°C).

VOLATILE ORGANIC COMPOUNDS
Unthinned: 2.79 lbs/gallon (534 grams/litre)
Thinned 10% (No. 2 or 3 Thinner): 3.20 lbs/gallon (676 grams/litre)

HAPS
Unthinned: 0.79 lbs/gal solids
Thinned 10% (No. 2 Thinner): 1.98 lbs/gal solids
Thinned 10% (No. 3 Thinner): 0.83 lbs/gal solids
Thinned 10% (No. 49 Thinner): 0.79 lbs/gal solids

THEORETICAL COVERAGE
978 mil sq ft/gal (24.0 m²/L at 25 microns). See APPLICATION for coverage rates.

Allow for overspray and surface irregularities. Wet film thickness is rounded to the nearest 0.5 mil or 5 microns. Application of coating below minimum or above maximum recommended dry film thicknesses may adversely affect coating performance.

**Mixing**

Stir thoroughly making sure no pigment remains on the bottom of the can. Use a power mixer and keep material under constant agitation while mixing.

**Thinning**

For spray, thin up to 10% or 3/4 pint (380 mL) per gallon with No. 2 Thinner if temperatures are below 80°F (27°C). Thin up to 10% or 3/4 pint (380 mL) per gallon with No. 3 Thinner if temperatures are above 80°F (27°C). For brush or roller, thin up to 10% or 3/4 pint (380 mL) with No. 3 Thinner. **Note:** No. 49 Thinner may be substituted where there are VOC restrictions. **Note:** NSF certification requires thinning with No. 2 Thinner. Use of any other thinner voids ANSI/NSF Std. 61 certification.

**Pot Life**

24 hours at 77°F (25°C) and 50% R.H. **Caution:** This product cures with moisture acting as a catalyst. Incorporation of moisture or moisture laden air (humidity) during use will shorten pot life. The use of a solvent blanket (small addition of solvent that sits atop the paint in the can) can help to retard a reaction with moisture in the container but agitation will have to be done by manual means, taking care to not disturb the solvent or incorporate it into the paint. Avoid continual agitation at high RPM. When feasible keep containers of material covered during use. For spray, thin up to 10% or 3/4 pint (380 mL) per gallon with No. 3 Thinner if temperatures are above 80°F (27°C). Thin up to 10% or 3/4 pint (380 mL) with No. 3 Thinner if temperatures are above 80°F (27°C). For brush or roller, thin up to 10% or 3/4 pint (380 mL) with No. 3 Thinner.

**Application Equipment**

**Note:** When intermediate and finish coats are white or light colors, best hiding of this primer can be achieved by spray application or when roller applied, using 1/4" synthetic woven nap roller covers.

### Air Spray

<table>

</tbody>
</table>

Use appropriate tip/atomizing pressure for equipment, applicator technique and weather conditions.

**Surface Temperature**

Minimum 35°F (2°C) Maximum 120°F (49°C). The surface should be dry and at least 5°F (3°C) above the dew point. **Note:** Series 44-710 Accelerator must be used if the surface temperature is 35°F to 60°F (2°C to 16°C) and 20% to 40% relative humidity, or if surface temperature is below 50°F (10°C) regardless of humidity.

**Ambient Humidity**

Minimum 20% Maximum 90%

Flush and clean all equipment immediately after use with the recommended thinner or xylene.

**Warranty & Limitation of Seller's Liability:** Tnemec Company, Inc. warrants only that its coatings represented herein meet the formulation standards of Tnemec Company, Inc. THE WARRANTY DESCRIBED IN THE ABOVE PARAGRAPH SHALL BE IN LIEU OF ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THERE ARE NO WARRANTIES THAT EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. The buyer's sole and exclusive remedy against Tnemec Company, Inc. shall be for replacement of the product in the event a defective condition of the product should be found to exist and the exclusive remedy shall not have failed its essential purpose as long as Tnemec is willing to provide comparable replacement product to the buyer. NO OTHER REMEDY (INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR LOST PROFITS, LOST SALES, INJURY TO PERSON OR PROPERTY, ENVIRONMENTAL INJURIES OR ANY OTHER INCIDENTAL OR CONSEQUENTIAL LOSS) SHALL BE AVAILABLE TO THE BUYER. Technical and application information herein is provided for the purpose of establishing a general profile of the coating and proper coating application procedures. Test performance results were obtained in a controlled environment and Tnemec Company makes no claim that these tests or any other tests, accurately represent all environments. As application, environmental and design factors can vary significantly, due care should be exercised in the selection and use of the coating.
