**VOLATILE ORGANIC COMPOUNDS**

**COATING SYSTEM**

**PRIMERS**

Galvanized Steel and Non-Ferrous Metal: Series 66, L69, N69, V69, 135, 1224. **Note:** For special galvanized surface preparation instructions, consult the latest version of Tnemec Technical Bulletin 10-78.

Concrete: Series 66, L69, L69F, N69, N69F, 104, 161

CMU: 54, 130. Intermediate coat required. **Note:** Before topcoating with Series 1075U, Series V530 exterior exposed for more than 24 hours must first be scarified or receive an intermediate coat of Tnemec polyamide epoxy. Reccoat windows for other primers may apply. See those data sheets for additional information.

**FINISH**

Semi-gloss

**SPECIAL QUALIFICATIONS**

Series 1075U meets the requirements of SSPC-36 (level 3) Paint Standard.

**PRODUCT PROFILE**

**GENERIC DESCRIPTION**

Aliphatic Acrylic Polyurethane

**COMMON USAGE**

A coating highly resistant to abrasion, wet conditions, corrosive fumes and exterior weathering. High build quality combines with project specific primers for two-coat, labor saving systems. Contains a blend of ultraviolet (UV) light absorbers for enhanced color and gloss retention. Fast curing options are available; see Curing Time below. Product has some applications as a direct to metal finish. Contact your Tnemec representative for more details. **NOT FOR IMMERSION SERVICE.**

**COLORS**

Refer to Tnemec Color Guide. **Note:** Certain colors may require multiple coats depending on method of application and finish coat color. When feasible, the preceding coat should be in the same color family, but noticeably different.

**FINISH**

Semi-gloss

**SPECIAL QUALIFICATIONS**

Series 1075U meets the requirements of SSPC-36 (level 3) Paint Standard.

**PERFORMANCE CRITERIA**

Contact your Tnemec representative for specific test results.

**RECOMMENDED DFT**

2.0 to 5.0 mils (50 to 125 microns) per coat. Number of coats and thickness requirements will vary with substrate, application method and exposure. Contact your Tnemec representative.

**THEORETICAL COVERAGE**

1,132 mil sq ft/gal (27.8 m²/L at 27 microns). See APPLICATION for coverage rates. **†**

**NET WEIGHT PER GALLON**

11.84 ± 0.25 lbs (5.37 ± .11 kg) †

**STORAGE TEMPERATURE**

Minimum 20°F (-7°C)     Maximum 110°F (43°C)

(Dry) Continuous 250°F (121°C)     Intermittent 275°F (135°C)

**TEMPERATURE RESISTANCE**

Part A: 24 months; Part B: 12 months at recommended storage temperature.

**SHELF LIFE**

Part A: 95°F (35°C)     Part B: 135°F (57°C)

**FLASH POINT - SETA**

Published technical data and instructions are subject to change without notice. The online catalog at www.tnemec.com should be referenced for the most current technical data and instructions or you may contact your Tnemec representative for current technical data and instructions.

**MIXING**

Stir contents of the container marked Part A, making sure no pigment remains on the bottom. Add the contents of the can marked Part B to Part A while under agitation. Continue agitation until the two components are thoroughly mixed. When used with 44-710 Urethane Accelerator, first blend 44-710 into Part A under agitation, continue as above. Do not use mixed material beyond pot life limits. Caution: Part B is moisture-sensitive and will react with atmospheric moisture. Unused material must be kept tightly closed at all times.

**THINNING**

For air or airless spray, thin up to 15% or 1 1/4 pints (570 mL) per gallon with No. 42 Thinner if temperatures are below 80°F (27°C), use No. 48 Thinner for temperatures above 80°F (27°C). For brush and roller, thin 15% or 1 1/4 pints (570 mL) per gallon with No. 39. Where lower VOC is required for air or airless spray, brush or roller application, thin up to 15% or 1 1/4 pints (570 mL) per gallon with No. 56 Thinner. Note: Thinning is required for proper application. Caution: Do not add thinner if more than 30 minutes have elapsed after mixing.

**POT LIFE**

1 1/2 hours at 75°F (24°C) unthinned 2 hours at 75°F (24°C) thinned

Low temperatures or longer hoses require higher pot pressure.

**Airless Spray Application**: Contact Tnemec Technical Services.

**Roller**: Use 1/4” or 3/8” (6.4 mm or 9.5 mm) synthetic woven nap roller covers. Do not use long nap roller covers. Two coats are required to obtain dry film thickness above 3.0 mils (75 microns).

**Brush**: Recommended for small areas only. Use high quality natural or synthetic bristle brushes. Two coats are required to obtain recommended film thickness above 3.0 mils (75 microns).

**Surface Temperature**

Minimum 55°F (2°C) Maximum 120°F (49°C)

The surface should be dry and at least 5°F (3°C) above the dew point.

Flush and clean all equipment immediately after use with the recommended thinner or MEK.

† Values may vary with color.

**WARRANTY & LIMITATION OF SELLER’S LIABILITY**: Tnemec Company, Inc. warrants only that its coatings represented herein meet the formulation standards of Tnemec Company, Inc. THE WARRANTY DESCRIBED IN THE ABOVE PARAGRAPH SHALL BE IN LIEU OF ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THERE ARE NO WARRANTIES THAT EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. The buyer’s sole and exclusive remedy against Tnemec Company, Inc. shall be for replacement of the product in the event a defective condition of the product is found to exist and the exclusive remedy shall not have failed its essential purpose as long as Tnemec is willing to provide comparable replacement product to the buyer. NO OTHER REMEDY (INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL LOSS) SHALL BE AVAILABLE TO THE BUYER. Technical and application information herein is provided for the purpose of establishing a general profile of the coating and proper coating application procedures. Test performance results were obtained in a controlled environment and Tnemec Company makes no claim that these tests or any other tests, accurately represent all environments. As application, environmental and design factors can vary significantly, due care should be exercised in the selection and use of the coating.
