Aliphatic Polyester Polyurethane

**Common Usage**
Extremely hard, chemical-resistant urethane coating with excellent resistance to abrasion, washdown conditions, corrosive fumes and chemical contact. Gloss retention among the best of air-dried finishes.

**Colors**
Available in the 16 standard StrataShield colors. Special colors available, please contact your Tnemec representative.

**Note**: Certain colors may require multiple coats depending on the method of application and finish coat color. When feasible, the preceding coat should be in the same color family (blue, gray, etc.), but noticeably different.

**Finish**
Semi-Gloss

**Performance Criteria**
Additional test data available. Contact your Tnemec representative for specific test results.

**Surface Preparation**
Prepare surfaces by method suitable for exposure and service. Refer to the appropriate primer data sheet for specific recommendations.

**Volume Solids**
67 ± 2.0% (mixed) †

**Recommended DFT**
2.0 to 3.0 mils (50 to 75 microns) per coat. **Note**: Number of coats will vary depending on substrate (surface) and other variables. Contact your Tnemec representative.

**Curing Time**
Curing time varies with surface temperature, air movement, humidity and film thickness.

**volatile organic compounds**

**Unthinned**: 2.41 lbs/gallon (288 grams/litre)

**Thinned 10% (Max) (No. 39 Thinner)**: 2.76 lbs/gallon (330 grams/litre)

**Thinned 10% (Max) (No. 42 Thinner)**: 2.80 lbs/gallon (335 grams/litre) †

**HAPS**

**Unthinned**: 0.16 lbs/gal solids

**Thinned 10% (Max) (No. 39 Thinner)**: 0.16 lbs/gal solids

**Thinned 10% (Max) (No. 42 Thinner)**: 0.16 lbs/gal solids

**Theoretical Coverage**
1,075 sq ft/gal (26.4 m²/L at 25 microns). See APPLICATION for coverage rates. †

**Number of Components**
Two: Part A and Part B (2.5 Parts A to 1 Part B by volume)

**Packaging**

<table>

**Net Weight Per Gallon**
11.01 ± 0.25 lbs (5.0 ± .11 kg) (mixed) †

**Storage Temperature**
Minimum 20°F (-7°C) Maximum 110°F (43°C)

**Shelf Life**
Part A: 24 months, Part B: 12 months at recommended storage temperature.

**Flash Point - Seta**
Part A: 104°F (40°C) Part B: >200°F (93°C)

**Health & Safety**
Paint products contain chemical ingredients which are considered hazardous. Read container label warning and Material Safety Data Sheet for important health and safety information prior to the use of this product.

**Keep out of the reach of children.**

</table>

Allow for overspray and surface irregularities. Film thickness is rounded to the nearest 0.5 mil or 5 microns. Application of coating below minimum or above maximum recommended dry film thicknesses may adversely affect coating performance.†

MIXING

Stir contents of each container, until uniform in consistency. Slowly mix 2.5 parts A component to 1 part B while under agitation until the two components are thoroughly mixed. Do not use mixed material beyond pot life limits. Part B is moisture-sensitive and will react with atmospheric moisture. Unused material must be kept tightly closed at all times. Important: Mixing ratio is 2.5 (Part A) to 1 (Part B) by volume.

THINNING

For airless spray, must be thinned 10% or 12 ounces (355 mL) per gallon with No. 42 Thinner. For brush or roller application, must be thinned up to 10% or 12 ounces (355 mL) with No. 39 Thinner. Caution: Do not add thinner if more than thirty (30) minutes have elapsed after mixing.

POT LIFE

1 1/2 hours at 60°F (16°C)  1 1/4 hours at 75°F (24°C)  1 hour at 100°F (38°C)

APPLICATION EQUIPMENT

<td>1/4” or 3/8” (6.4 or 9.5 mm)</td>
<td>60-100 mesh (250-150 microns)</td>
</tr>
</tbody>
</table>

Use appropriate tip/atomizing pressure for equipment, applicator technique and weather conditions.

Roller: Use 1/4” or 3/8” (6.4 mm to 9.5 mm) synthetic woven nap roller cover. The 1/4” covers generally provide the best flow and leveling properties.

Brush: Use high quality natural or synthetic bristle brushes.

SURFACE TEMPERATURE

Minimum 40°F (4°C)  Maximum 135°F (57°C)

The surface should be dry and at least 5°F (5°C) above the dew point. This product is moisture-sensitive until cured. Application of the coating above the maximum recommended dry film thickness may cause bubbles to form in the cured film.

CLEANUP

Flush and clean all equipment immediately after use with the recommended thinner or MEK.

† Values may vary with color.
