**PRODUCT PROFILE**

**GENERIC DESCRIPTION**
Aromatic Urethane, Zinc-Rich

**COMMON USAGE**
A single-component, moisture-cured, zinc-rich primer for steel structures, including the interior and exterior of steel potable water tanks. Provides outstanding long-term corrosion resistance when used as a primer in conjunction with other Tnemec coatings. It cures quickly and offers rapid recoat at surface temperatures down to 35°F (2°C). **Note:** When used in conjunction with cathodic protection, anodes or impressed current systems should not provide current demand more negative than −1.95 volts relative to a copper-copper sulfate reference electrode half-cell.

**COLORS**
Greenish-gray

**ZINC PIGMENT**
83% by weight in dried film

**SPECIAL QUALIFICATIONS**
Certified (with or without 44-710 Urethane Accelerator) in accordance with ANSI/NSF/CAN Std. 61 and the extraction requirements of NSF/ANSI/CAN 600 and is qualified for use on interior potable water tanks of 500 gallons or greater. Topcoating with Std. 61 certified Tnemec coatings is required. Contact your Tnemec representative for specific recommendations. Reference “Search Listings” section of the NSF website at www.nsfg.org for details on the maximum allowable DFT. Meets zinc-rich primer requirements of AWWA D102-17 Standard for Inside System No. 3, 5 & 6 and Outside System No. 3, 4 & 6. Series 94-H₂O uses a zinc pigment which meets the requirements of ASTM D 520 Type III and contains less than 0.02% lead.

Series 94-H₂O was tested in accordance with, and passed, the California Dept. of Public Health (CDPH) Standard Method v1.2 and meets the requirements of LEED v4.1 Low-Emitting Materials, Collaborative for High Performance Schools-Paints & Coatings, Living Building Challenge Materials Petal 10, and WELL Building Standard v2 X06 VOC Restrictions.

**PERFORMANCE CRITERIA**
Extensive test data available. Contact your Tnemec representative for specific test results.

**COATING SYSTEM**

**TOPCOATS**
Exterior: Series 27WB, 66, L69, L69F, N69, N69F, 72, 73, 115, V115, 156, 161, 215, 1026, 1028, 1029, 1074, 1074U, 1075, 1075U, 1080, 1081, 1094, 1095, 1096. **Note:** Certain topcoat colors may not provide one-coat hiding depending on method of application. Contact your Tnemec representative. Series 94-H₂O must be exterior exposed for three days prior to topcoating with Series 1028 or 1029. **Note:** Series 94-H₂O must be exterior exposed for one day prior to topcoating with Series 27WB.

**SURFACE PREPARATION**
Wet Interior: SSPC-SP10/NACE 2 Near-White Blast Cleaning with a minimum angular anchor profile of 1.5 mils.
Exterior or Dry Interior: SSPC-SP6/NACE 3 Commercial Blast Cleaning with a minimum angular anchor profile of 1.5 mils.

**TECHNICAL DATA**

**VOLUME SOLIDS**
62.0 ± 2.0% (mixed)

**RECOMMENDED DFT**
2.5 to 3.5 mils (65 to 90 microns) per coat.

**CURING TIME**
Without 44-710

† 50% relative humidity. **Note:** Refer to product listings on www.nsfg.org for specific potable water return to service information. Cure time will vary with surface temperature, humidity and film thickness. Ventilation: When used in confined areas, provide adequate ventilation during application and cure.

**VOLATILE ORGANIC COMPOUNDS**
Unthinned: 0.74 lbs/gallon (89 grams/litre)
Thinned 15% (No. 49 Thinner): 0.74 lbs/gallon (89 grams/litre)
Thinned 10% (No. 3 Thinner): 1.57 lbs/gallon (188 grams/litre)
Thinned 10% (No. 2 Thinner): 1.56 lbs/gallon (187 grams/litre)

**HAPS**
Unthinned: 1.68 lbs/gal solids
Thinned 15% (No. 49 Thinner): 1.68 lbs/gal solids
Thinned 10% (No. 5 Thinner): 1.72 lbs/gal solids
Thinned 10% (No. 2 Thinner): 2.84 lbs/gal solids

**THEORETICAL COVERAGE**
996 mil sq ft/gal (24.4 m²/L at 25 microns). See APPLICATION for coverage rates.

**NUMBER OF COMPONENTS**
One

**PACKAGING**
5 gallon (18.9L) pails (yields 3 gallons) and 1 gallon (3.79L) cans.

**NET WEIGHT PER GALLON**
24.9 ± 0.60 lbs (11.3 ± .27 kg)

**STORAGE TEMPERATURE**
Minimum 20°F (-7°C) Maximum 110°F (43°C)

**TEMPERATURE RESISTANCE**
Dry (Continuous) 250°F (121°C) Intermittent 300°F (149°C)

**SHELF LIFE**
9 months at recommended storage temperature.

**FLASH POINT - Seta**
82°F (28°C)

Allow for overspray and surface irregularities. Wet film thickness is rounded to the nearest 0.5 mil or 5 microns. Application of coating below recommended dry film thicknesses may adversely affect coating performance. Reference the NSF website at www.nsf.org for details on the maximum allowable DFT.

**MIXING**

Stir thoroughly making sure no pigment remains on the bottom of the can. Use an air-driven power mixer and keep material under constant agitation while mixing. Do not use material beyond pot life limits.

**THINNING**

For air spray, thin up to 15% or 1 1/4 pints (570 mL) per gallon with No. 49 Thinner or thin up to 10% or 3/4 pint (380 mL) per gallon with No. 2 or No. 3 Thinner. For air spray, thin up to 15% or 1 1/4 pints (570 mL) per gallon with No. 49 Thinner or thin up to 10% or 3/4 pint (380 mL) per gallon with No. 2 or No. 3 Thinner. Thinning is normally not required for airless spray. **Caution**: No. 49 Thinner may be used where VOC restrictions apply.

**POT LIFE**

8 hours at 77°F (25°C) and 50% R.H.

Caution: This product cures with moisture acting as a catalyst. Incorporation of moisture or moisture laden air (humidity) during use will shorten pot life. Avoid continual agitation at high RPM. When feasible keep containers of mixed material covered during use.

**APPLICATION EQUIPMENT**

Note: When intermediate and finish coats are white or light colors, best hiding of this dark color primer can be achieved by spray application, or when roller applied, by using 1/4” nap covers.

**Air Spray**

</tbody>
</table>

Use appropriate tip/atomizing pressure for equipment, applicator technique and weather conditions.

**Surface Temperature**

Minimum 55°F (2°C) Maximum 140°F (60°C) Maximum for Brush & Roller 120°F (49°C)

The surface should be dry and at least 5°F (3°C) above the dew point. **Note**: Series 44-710 Accelerator must be used if the surface temperature is 35°F (2°C) to 60°F (24°C to 16°C) and 20% to 40% relative humidity. Please reference Technical Bulletin 98-14 for more information.

**Ambient Humidity**

Minimum 20% Maximum 90%

**Cleanup**

Flush and clean all equipment immediately after use with the recommended thinner or xylene or, when required by SCAQMD regulations, No. 49 Thinner.

**Caution**

Series 94-H₂O, with one-component configuration, prevents the product’s ability to offer “dry-fall” characteristics.
