### PRODUCT PROFILE

**GENERIC DESCRIPTION**
Fluid-applied acrylic insulation coating

**COMMON USAGE**
An innovative, fluid-applied, thermal insulating coating utilizing aerogel particles that imparts exceptional insulative properties to a variety of substrates. Ideal for insulating pipes, valves, tanks, structural steel, or other substrates where thermal improvement or personnel protection is desired. Part of a durable, corrosion-resistant coating system that bonds to the substrate, greatly reducing the issues associated with corrosion under insulation (CUI) and mitigating thermal bridging by controlling condensation.

**COLORS**
Matte

**FINISH**
1278 Insulation Yellow, WH13 White

**SPECIAL QUALIFICATIONS**
- Thermal Conductivity (ASTM C518 at 77°F): 0.0356 W/m·K or 0.2468 BTU-in/ft²-hr-°F (R value at one inch equals 4.1)
- Flame Spread (ASTM E84): Class A
- Smoke Developed (ASTM E84): Class A
- Tested in accordance with NORSOK M-501/ISO 20340

Series 971 was tested in accordance with, and passed, the California Department of Public Health CDPH/EHLB/Standard Method Version 1.1, 2010 emissions testing and meets qualifications of LEED v4, Collaborative for High Performance Schools, and Living Building Challenge.

### COATING SYSTEM

**PRIMERS**
- **Steel**: Series 90E-92, 90-97, 90G-1K97, 90-98, 91-H₂O, 94-H₂O, 115, 394, 1224. **Note:** The use of zinc-rich primers is not generally recommended when in-service temperatures exceed 120°F (49°C). Reference NACE SP0198 for more information.
- **Galvanized Steel and Non-Ferrous Metal**: Series 115, 1224
- **Concrete**: Series 1224
- **CMU**: Series 1224

**Note:** Refer to appropriate primer data sheet for maximum temperature resistance.

**TOPCOATS**
Series 22, 27WB, 72T, 115, 1028T, 1224. Other topcoats may be available; contact your Tnemec representative for more information. **Note:** A cure time of 24 hours at 75°F (24°C) is required before topcoating Series 971. Extended cure time may be required at lower temperatures.

### SURFACE PREPARATION

**GALVANIZED STEEL & NON-FERROUS METAL**
Surface preparation recommendations will vary depending on substrate and exposure conditions. Consult the latest version of Tnemec Technical Bulletin 10-78 or contact your Tnemec representative or Tnemec Technical Services. Must be clean, dry and free of oil, grease and other contaminants.

### TECHNICAL DATA

**VOLUME SOLIDS**
76 ± 2.0% (mixed) †

**RECOMMENDED DFT**
30.0 to 50.0 mls (762 to 1270 microns) per coat. **Note:** For use as a thermal break, recommended total dry film thickness is 80 to 100 mls (2032 to 2540 microns). Thickness may vary by project. **Note:** Multiple coats may be required, please contact your Tnemec Representative for film thickness recommendations.

**CURING TIME**

†Recoat times listed are with itself. Curing time varies with surface temperature, air movement, humidity and film thickness.

**VOLATILE ORGANIC COMPOUNDS**
0.016 lb/gallon (1.9 grams/litre) †

**HAPS**
0 lb/gal solids

**THEORETICAL COVERAGE**
1.219 mil sq ft/gal (30.0 m²/L at 25 microns). See APPLICATION for coverage rates. †

**NUMBER OF COMPONENTS**
One

**PACKAGING**
Five-gallon pail yielding 3.5 gallons (13.25 L) and one-gallon can yielding 0.70 gallons (2.65 L).

**NET WEIGHT PER GALLON**
4.71 lbs ± 0.25 lbs (2.14 ± 0.11 kg) (mixed) †

**STORAGE TEMPERATURE**
Minimum 40°F (4°C) / Maximum 110°F (43°C) PROTECT FROM FREEZING

**TEMPERATURE RESISTANCE**
(Dry) Continuous 325°F (163°C)

**SHELF LIFE**
12 months at recommended storage temperature.

**FLASH POINT - SETA**
>230°F (110°C)

**HEALTH & SAFETY**
Paint products contain chemical ingredients which are considered hazardous. Read container label warning and Material Safety Data Sheet for important health and safety information prior to the use of this product. **Keep out of the reach of children.**
### APPLICATION

#### COVERAGE RATES

<table>
<thead>
<tr>
<th></th>
<th>Dry Mils (Microns)</th>
<th>Wet Mils (Microns)</th>
<th>Sq Ft/Gal (m²/Gal)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum</td>
<td>30.0 (762)</td>
<td>40.0 (1016)</td>
<td>41 (3.8)</td>
</tr>
<tr>
<td>Maximum</td>
<td>50.0 (1270)</td>
<td>65.0 (1650)</td>
<td>24 (2.3)</td>
</tr>
</tbody>
</table>

Practical coverage rates. Allow for overspray and surface irregularities. Application of coating below minimum or above maximum recommended dry film thicknesses may adversely affect coating performance. †

#### MIXING

Mix thoroughly under low agitation. A box blade (H-paddle) is recommended.

#### THINKING

DO NOT THIN

#### APPLICATION EQUIPMENT

Refer to the Series 971 Application Guide or contact Tnemec Technical Services for specific application information.

#### SURFACE TEMPERATURE

Minimum 45°F (7°C)     Maximum 200°F (93°C)

The surface should be dry and at least 5°F (3°C) above the dew point. Coating will not cure below minimum surface temperature.

#### CLEANUP

Flush and clean all equipment immediately after use with clean water.

† Values may vary with color.

#### NOTICE

Aerolon performance data, thermal modeling, and construction details are provided as a convenience to the architect, engineer, building owner, and applicator to aid in product selection. This information is based on standardized tests and specific construction designs that may not pertain directly to each building, structure, vessel, or project. Use and placement of the product, and product performance estimations shall be reviewed and approved by the project's design professional.

WARRANTY & LIMITATION OF SELLER'S LIABILITY: Tnemec Company, Inc. warrants only that its coatings represented herein meet the formulation standards of Tnemec Company, Inc. THE WARRANTY DESCRIBED IN THE ABOVE PARAGRAPH SHALL BE IN LIEU OF ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THERE ARE NO WARRANTIES THAT EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. The buyer's sole and exclusive remedy against Tnemec Company, Inc. shall be for replacement of the product in the event a defective condition of the product should be found to exist and the exclusive remedy shall not have failed its essential purpose as long as Tnemec is willing to provide comparable replacement product to the buyer. NO OTHER REMEDY (INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR LOST PROFITS, LOST SALES, INJURY TO PERSON OR PROPERTY, ENVIRONMENTAL INJURIES OR ANY OTHER INCIDENTAL OR CONSEQUENTIAL LOSS) SHALL BE AVAILABLE TO THE BUYER. Technical and application information herein is provided for the purpose of establishing a general profile of the coating and proper coating application procedures. Test performance results were obtained in a controlled environment and Tnemec Company makes no claim that these tests or any other tests, accurately represent all environments. As application, environmental and design factors can vary significantly, due care should be exercised in the selection and use of the coating.
