FAST DRY ALUMINUM
SERIES 43-236

PRODUCT PROFILE

GENERAL DESCRIPTION
Copolymer Aluminum

COMMON USAGE
Fast drying spray-applied coating offering good protection for most exterior weathering conditions. Note: Series 43-236's 'dry-fall' characteristics help reduce the potential for overspray problems on buildings and surrounding property.

COLORS
Aluminum

FINISH
Semi-Gloss

COATING SYSTEM

PRIMERS
Series 37H

SURFACE PREPARATION

ALL SURFACES
Must be clean, dry and free of oil, grease and other contaminants. Remove rust and paint not tightly bonded. Spot prime.

TECHNICAL DATA

VOLUME SOLIDS
21% ± 2.0%

RECOMMENDED DFT
1.0 to 1.5 mils (25 to 40 microns) per coat. Note: Number of coats recommended will vary depending on exposure conditions and other variables. Contact your Tnemec representative for specific recommendations.

CURING TIME

Curing time varies with surface temperature, air movement, humidity and film thickness.

VOLATILE ORGANIC COMPOUNDS
5.67 lbs/gallon (680.3 grams/litre)

NUMBER OF COMPONENTS
One

PACKAGING
55 gallon (208.2L) drums, 5 gallon (18.9L) pails and 1 gallon (3.79L) cans.

NET WEIGHT PER GALLON
8.0 ± 0.25 lbs (3.62 ± .11 kg)

STORAGE TEMPERATURE
Minimum 20°F (-7°C) Maximum 110°F (43°C)

SHELF LIFE
12 months at recommended storage temperature.

FLASH POINT - SETA
52°F (11°C)

HEALTH & SAFETY
Paint products contain chemical ingredients which are considered hazardous. Read container label warning and Safety Data Sheet for important health and safety information prior to the use of this product.

Keep out of the reach of children.

Allow for overspray and surface irregularities. Film thickness is rounded to the nearest 0.5 mil or 5 microns. Application of coating below minimum or above maximum recommended dry film thicknesses may adversely affect coating performance.

MIXING
Stir thoroughly, making sure no pigment remains on the bottom of the can.

Do not thin.

Use appropriate tip/atomizing pressure for equipment, applicator technique and weather conditions.

SURFACE PREPARATION

Minimum 40°F (4°C) Maximum 120°F (49°C)
The surface should be dry and at least 5°F (5°C) above the dew point.

CLEANUP
Flush and clean all equipment immediately after use with No. 2 Thinner or xylol.
CAUTION

Dry overspray can be wiped or washed from most surfaces. Satisfactory dry-fall performance depends upon height of work, weather conditions and equipment adjustment. Low temperature and high humidity are of particular concern. Test for each application as follows: Spray from 15 to 25 feet towards paint container. The material then should readily wipe off. Note: Heat can fuse-dry overspray to surfaces. Always clean dry overspray from hot surfaces before fusing occurs. Be aware that exterior surface temperatures can be higher than air temperature.
